Manual 1:

Particulars of Organization, Functions and Duties

Introduction

National Centre for Polar and Ocean Research (NCPOR), (formerly known as the “Antarctic Study Centre” and “National Centre for Antarctic & Ocean Research”) an autonomous R&D organization of the Ministry of Earth Sciences, Government of India, is involved in conducting and facilitating a variety of scientific research activities ranging from co-ordinating and implementing the National Polar Programme, to scientific research in the Southern Ocean realm. Spread across 1,47,660 sq. mtr. of area on the Sada Headland, overlooking the Arabian Sea, this Centre, since its inception has been playing a key role in:

- the overall planning, co-ordination and implementation of the scientific programmes mounted in Antarctica
- Establishing and maintaining National Research bases in Arctic and Antarctica and for providing the operational and logistic support for the Annual Indian Scientific Expeditions to both Arctic and Antarctica as well as to Southern Ocean.
- Implementation of the Indian Continental Shelf Programme on behalf of the Ministry.
- Technical management of the country’s flagship ORV Sagar Kanya and other vessels chartered by the Ministry
- Surveys in Exclusive Economic Zone (EEZ) of India, an undertaking marine geological study.

In addition to the above, the Centre has a well-focused scientific mandate of initiating and supporting basic and applied research in a variety of scientific disciplines and themes that are otherwise not being pursued by any institution or laboratory in the country. This scientific mandate recognizes, as its backdrop, the need to understand the relationships of the polar, atmospheric, and Southern Ocean realms vis-à-vis global processes, the importance of the Antarctic and Southern Ocean regions for our understanding of the global environment, the need to understand these regions as unique entities, and the opportunities presented by these realms as research platforms.

At NCPOR, the scientific endeavors are multidisciplinary in scope and content. The institute boasts of the country's only ice-core archival, processing and analytical facilities comprising an ultra-cold room at a temperature of -20°C and a class 100 clean room. The analytical instrumentation for the ice samples consists of such state-of-the-art tools as Inductively Coupled Plasma, Mass Spectrometer for high sensitivity ultra-trace elemental studies, reagent-free Ion Chromatograph, Stable Isotope Mass Spectrometer, etc. Complementing the chemical studies of the ice samples brought from Antarctica are the research activities of the Southern Ocean group with its expertise in physical, chemical, biological and geological oceanographic studies. Environmental and ecological studies pertaining to the pristine continent of Antarctica are two of the other emerging thrust areas of research at NCPOR

Vision, Mission and Key Objectives:

VISION

To contribute towards building scientific capability besides carrying out scientific research of National relevance and to play pivotal role in running strategic Polar and Ocean programs which are directly of country's interest in terms of exploring and exploiting resources towards socio-economic benefit of the society.

MISSION

- To plan, promote, co-ordinate and execute the entire gamut of polar science and logistic activities of the country in order to ensure a perceptible and influential presence of India in Antarctica and to uphold our strategic interests in the global framework of nations in the southern continent and the surrounding oceans.
- Augment the logistical assets of the country including new research bases, polar research vessels, scientific augmentations;
- Expansion of a significant, interdisciplinary observing network to support a new robust earth system models;
- Unified scientific social responsibility program to plan and implement improved mechanisms for reaching out to people and develop enhanced international collaboration in scientific field area;
- Use the congregation of emerging technologies for the scientific study in strategic programs.
